

# Pristine Stretch Ceiling Solutions

Stretch ceiling solutions for the retail, office & exhibition sectors

Pristine are the UK's number 1 when it comes to working with stretch ceilings in the commercial sector.

## Why use Pristine Stretch Ceilings?

Our in house design team can assist you to create ceilings of **almost any shape or style**.

We don't just fit the ceiling or lighting panel, we are involved in the entire process **from the initial design to the construction** of ceiling & lighting frames & underconstruction and finally the installation of the stretch ceiling or wall panel.

Pristine's Stretch Ceilings can accommodate the addition of **lighting, vents or duct**. Any lighting can easily be fitted into the stretch ceilings, whether it's above - incorporating our see through ceilings, underneath - with any lights, or transposed into with spot lights. To help take your creativity to the next level we can also supply and install custom created **fibre optics** to create stunning lighting effects.

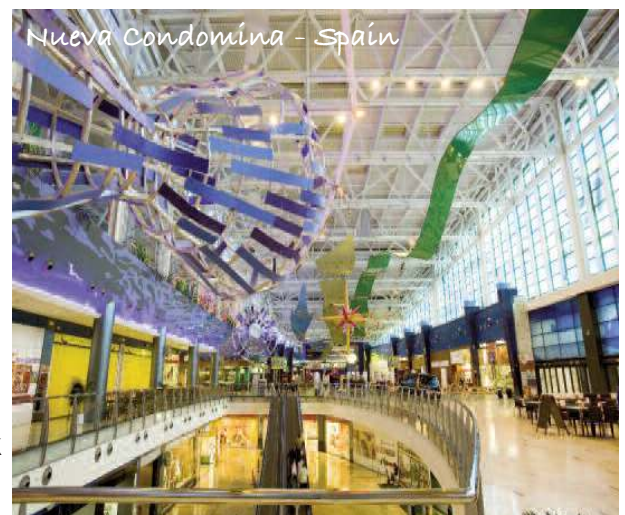

Our **translucent panels** can be used to turn your entire ceiling into a light diffuser or can be used on individual display areas. Our high gloss membranes can be installed to any shape you can imagine.

Our clients use our products in areas of **high visual impact**, where they want to highlight a particular item or area.

With **over 130 differing colours and finishes** available, Pristine's Stretch Ceiling System adapts perfectly to all your projects.

Pristine's Stretch Ceiling System is not just a beautiful product it is also **functional, durable & practical**, and can be used in almost any situation. It is a designers dream as almost any shape or form can be created.

Pristine's Stretch Ceilings installations are performed by our **professionally trained CSCS fitters**. The procedure is quick and clean with no dust, mess or disruption.
